## **BirdDog Enters Sage Construction and Real Estate Development Partner Program as Sage Timberline Office Development Partner**

Urbandale, IA – BirdDog announced today they have entered into the Sage Construction and Real Estate Development Partner Program for its Company Career Site recruitment application. The invitation by Sage Construction and Real Estate arrived after a vetting process that included a solution review by Sage product management and sales channel members, as well as references supplied by BirdDog customers.

As part of arrangement, BirdDog has integrated its solution to Sage Timberline Office. The integration will allow for a seamless transfer of a candidate record in BirdDog to an employee record in Sage Timberline Office, as well as past employee information from Sage to BirdDog for employees being considered for rehire.

“We are pleased to have been accepted into the Sage Construction and Real Estate Development Partner Program” said John von Harz, President of BirdDog, “Our customers are demanding more integration between their various back-office systems, and connecting the candidate record within BirdDog with an accounting solution’s employee record is natural.”

“We are happy to welcome BirdDog into the Development Partner Program,” said Jon Witty, vice president and general manager of Sage Construction and Real Estate Solutions. “BirdDog’s integrated HR solutions will provide our customers with the competitive advantage they need to build a stronger workforce as the construction industry rebounds.”

About BirdDog

BirdDog believes that people drive business success and that locating them is harder than ever. We promote an “always-on recruitment” mentality to employers that share our philosophy. BirdDog focuses on construction, infrastructure, engineering and facilities companies, and delivers through a web based Company Career site application that is embedded to the employer’s current web presence. The hosted and preconfigured solution provides an easy, fast and cost effective solution for small to mid-sized contractors and design firms.
